

California Environmental Protection Agency

Central Valley Regional Water Quality Control Board

Water Quality Certification Application Information

Applications missing any of the following 7 items may be considered incomplete.

1. An initial fee deposit of **\$640.00**. The total fee is based on the acres of fill or amount that is to be dredged as found in Title 23 CCR Section 2200(e). Please use the fee calculator found at http://www.waterboards.ca.gov/water_issues/programs/cwa401/docs/dredgefi_lfeecalculator.xls to calculate your total fee. The correct fee and a copy of the fee calculator shall be submitted prior to the issuance of certification. The check should be made payable to the State Water Resources Control Board and mailed to the appropriate CRWQCB office at the addresses below. If our office becomes the Lead Agency for your project, additional fees will be required based on staff hours for completion of a California Environmental Quality Act (CEQA) document.
2. A copy of the application and/or the §404 federal permit from the U.S. Army Corps of Engineers (ACOE) including the Regulatory Branch Number. This item is not required if the applicant will be using a non-reporting Nationwide permit number; however, this only applies to projects not located in environmentally sensitive areas. All dredging projects require a permit from the ACOE. The applicant is responsible to complete their project within the expiration date of the permit.
3. An adequate description of the project. Include a location map, starting dates, and the expected project duration, and photos if available. Calculate the total area of jurisdictional waters of the U.S., that will be temporarily and permanently impacted, (in acres). State if dredging or cofferdams will be required. Pumping from cofferdams must meet turbidity requirements from our Basin Plan.
 - A dewatering permit may be required if the discharge does not exceed 0.25 mgd and the project duration is less than 4 months. Projects that require dewatering in excess of the 0.25 mgd or/longer than 4 months must obtain waste discharge requirements.
 - If your project comprises one (1) acre or more of disturbed area, you must obtain coverage under the NPDES General Permit for Storm water Discharges Associated with Construction Activities. A copy of the Notice of Intent (NOI) with the issued WDID number shall be submitted with the application. Please contact Jacque Kelley in our Sacramento Office at (916) 464-4764, Scott Zaitz or Andrew Jensen in our Redding Office at

(530) 224-4845, or Debbie Bates in our Fresno Office at (559) 445-6281 for information regarding Storm water permits.

4. A copy of the application or agreement for Lakebed or Streambed Alteration Agreement (LSAA) from the Department of Fish and Game (DFG), or correspondence from DFG stating that no LSAA is required for your project. Projects on federal property are exempt from obtaining LSAA.
5. Provide documentation of compensatory mitigation efforts required to offset impacts associated with the proposed project and/or required by the ACOE.
6. Evidence of the California Environmental Quality Act (CEQA) and/or National Environmental Policy Act (NEPA) compliance must be submitted. Compliance includes: a) Notice of Exemption, state Type, Class and Section Numbers for exemption. Questionable exemptions will be reviewed by our Office of Chief Counsel or b) An initial Environment Assessment with a Negative Declaration, if the project will not impact jurisdictional waters of the U.S., including wetlands, or other resources, i.e., fish, wildlife and plants. or c) An Environmental Impact Report (EIR) addressing mitigation measures or a Mitigated Negative Declaration (MND), if the project impacts any jurisdictional waters of the U.S., including wetlands, or other resources. The EIR or MND must state all on and off-site mitigation measures and all overseer agencies for the development of wetlands.
7. A storm water mitigation plan, if applicable, including a clear description, design calculations, and map of all post-construction Best Management Practices (BMPs) (i.e. swales, detention basins, etc.) to be incorporated into the project to ensure that adequate treatment of storm water runoff will occur on-site.

NEPA Internet location: http://www.ceres.ca.gov/env_law/federal/nepa.html

If you need further assistance the following are the contact person per office:

Sacramento Office¹

Patrick G. Gillum, Environmental Scientist
11020 Sun Center Drive # 200
Rancho Cordova, California 95670-6114
(916) 464-4709
pgillum@waterboards.ca.gov

Robert Solecki, Environmental Scientist
11020 Sun Center Drive # 200
Rancho Cordova, California 95670-6114
(916) 464-4684
rsolecki@waterboards.ca.gov

Redding Office

Scott Zaitz, Environmental Scientist
415 Knollcrest Drive, Suite 100
Redding, California 96002
(530) 224-4784
szaitz@waterboards.ca.gov

Andrew Jensen, Environmental Scientist
415 Knollcrest Drive, Suite 100
Redding, California 96002
(530) 224-4787
ajensen@waterboards.ca.gov

Fresno Office

Debbie Bates, Environmental Scientist
1685 E Street
Fresno, CA 93706-2007
(559) 445-6281
dbates@waterboards.ca.gov
